APAC INNOVATION SUMMIT

Smart City. Connected City.

7-8 September 2017

Grand Hall, Convention Centre 3, Science Park

This conference will focus on how technology can drive City Transformation. On both the city and regional levels, we will explore the Smart City Blueprint for Hong Kong and how smart resilient planning can successfully be realised in neighboring countries.

On Day 2, we will further the discussion of how sensor technologies can connect for a wide range of applications including smart lighting, home automation, smart parking, surveillance, air and water quality monitoring, wellness monitoring and other novel applications.
